## Palm Harbor Marina Expansion

West Palm Beach, FL

**OWNER**

Leisure Resorts, LLC

**ENGINEER**

Bolchoz Marine Advisors

**COMPLETION DATE**

2017

**CONSTRUCTION COST**

\$485,000

Palm Harbor Marina is a full-service marina that offers over 200 slips for up to 250' mega-yachts. It has a Marinetek concrete floating dock system with ample single and three phase power, as well as water, sewer and fire protection. A state of the art Wi-Fi system provides service throughout the marina. MLCI was contracted to install an owner furnished 22 slip concrete floating dock system that expanded the marina capacity to accommodate mega-yachts to 250' in length. MLCI work included removal and relocation of an existing floating dock, installation of an owner purchased concrete floating dock system, installation of dock anchor piling, modifications to the upland bulkhead and gangway installation.
